## EDUCATION

### 1. Bachelor of Business & Information Technology

IBIT, University Of Punjab

2022-2026

---

## EXPERIENCE

### 1. FairchanceForCRM | Lahore Pakistan

April-2025 to Ongoing

Worked as intern in Odoo development. Learned to develop and render email templates. Creation and Customizing custom modules, Various views Like form, list, and record. Generate PDF reports using both dynamic data and static content.

### 2. Creative Dots | Lahore Pakistan

01-July-2023 to 23-AUG-23

Proficient in leveraging advanced data science and machine learning libraries, including Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PyTorch, TensorFlow, OpenCV, and NLTK, to develop insightful analyses and robust models. Hands-on experience with YOLO v8 for object detection tasks, utilizing Jupyter Notebook as the primary development environment for experimentation, visualization, and deployment-ready solutions.

---

## PROJECTS

### 1. Hospital Management System in Odoo

Currently working on this project, Developed form, list, report views, and custom Patient card. Automated email feature that sends a welcome message upon patient record creation and an update email highlighting changes when the record is modified. Also used Dynamic Rendering.

### 2. Travels Management System in Odoo

I have worked on this project, where I've developed form, list, report views, and custom tour card. I also implemented an automated email feature that sends a welcome message upon patient record creation and an update email highlighting changes when the record is modified.

### 3. Library Management System in Python

I have Added features Addition and Removal Of students, staff and Teachers. I have also added a feature of Searching by their names and identities.

### 4. Backend Rest API in Python, Django

I have created backend Rest API in Python by using Django Framework, But i didn't complete it bcz of other university projects.

## 5. Hotel Reviews Using AI in Python

We have made a model that predicts the type of Hotel on the basis of reviews and stars.

## 6. MS-Paint In C

InThis project, we added features of Making shapes with dynamic Values, You can also 'Draw any image by using arrow keys. you can also change colors.
