

Syed Muhammad Taha

Specialization: IT

Summary:

Driven AI/ML enthusiast skilled in Python and core ML algorithms. Quick learner with hands-on project experience and a passion for real-world problem-solving. Currently diving into deep learning and NLP—ready to grow and contribute to impactful AI work.

📍 Wafaqi Colony, Johar Town, Lahore

EDUCATION:

- **University Of Punjab, IBIT Dept**
Bachelor of Business & Information Technology
2022 - 2026

CERTIFICATE:

May-2023 to July-2023

- **AI/ML Engineer, NAVTECC**

Libraries:

Pandas, Matplotlib, Numpy, Seaborn, Scikit-learn, Pytorch, TensorFlow, OpenCV, NLTK

Models:

Yolo v8

Tools:

Jupyter Notebook

PROGRAMMING LANGUAGE:

- Python
- C++
- C
- XML
- HTML
- CSS

TOOLS:

- MS-Office
- LinkedIn Sales Navigator
- Apollo.io
- VS Code
- Jupyter Notebook
- Git-Github

EXPERTISE:

- Leadership
- Technical skills
- Critical Thinking
- Creativity
- Negotiation
- Research
- Management Skills

WORK EXPERIENCE:

- **Creative Dots | Lahore Pakistan**

April-2025 to Ongoing

Proficient in leveraging advanced data science and machine learning libraries, including Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PyTorch, TensorFlow, OpenCV, and NLTK, to develop insightful analyses and robust models. Hands-on experience with YOLO v8 for object detection tasks, utilizing Jupyter Notebook as the primary development environment for experimentation, visualization, and deployment-ready solutions.

Projects:

- **Hotel Reviews Using AI in Python**

Developed a machine learning-based hotel review prediction system that analyzes customer feedback and predicts sentiment (positive/negative) using NLP techniques. The model helps hotels quickly understand guest satisfaction through automated review analysis.

Libraries:

Pandas, Numpy, Matplotlib, Seaborn, Scikit-learn,

- **Hospital Management System in Odoo**

Currently working on this project, Developed form, list, report views, and custom Patient card. Automated email feature that sends a welcome message upon patient record creation and an update email highlighting changes when the record is modified. Also used Dynamic Rendering.

FVP IDEAS:

1. Crafting a cutting-edge web app that redefines business automation through AI — with intelligent decision-making, predictive insights, and autonomous tools like smart lead bots, onboarding workflows, summarizers, and image detection.
