A:Wafaqi Colony, Johar Town, Lahore

Objective

A proactive engineer with a passion for intelligent innovation, seeking an entry-level opportunity to begin a professional journey. Eager to apply academic knowledge in real-world challenges, learn quickly, and contribute effectively to a forward-thinking team. Dedicated to designing scalable AI models and machine learning systems that drive meaningful, data-driven change.

Education

- Dec 2022 – Present **BBIT** **University of Punjab, New Campus, Lahore**
IT Specialization

Experience

- Apr 2023 – Jul 2023 **AI / ML Intern** **Creative dots**
I had worked there as an AI/ML intern. I had learned there how to make AI models using different libraries of Python like Pandas, Seaborn, Scikit-learn, OpenCV, Matplotlib, NLP (NLTK), and tools like PyTorch and YOLOv8. Used environments like VS Code and Jupyter Notebook.

Projects

- Sep 2024 – Oct 2024 **AI Powered Hotel Review System** <https://github.com/smuhammadtaha3/Machine-Learning>
To classify hotel reviews based on their sentiment — whether the review is Negative, Neutral, or Positive — using machine learning techniques. This helps businesses understand customer feedback at scale without manually reading each review.

Python

Scikit-learn

Matplotlib

Pandas

NLTK

Seaborn

RE

- Jun 2023 – Aug 2023 **Backend Rest API, Django**
I have created backend Rest API in Python by using Django Framework, But I didn't complete it
bcz of other university projects.

- Apr 2023 – May 2023 **MS-Paint In C**

In this project, we added features of Making shapes with dynamic Values, You can also 'Draw any image by using arrow keys. you can also change colors.

Skills

- Programming Languages (Intermediate)
- Problem-Solving (Intermediate)
- Project Planning (Intermediate)

- Critical Thinking
(Intermediate)
- Team Leadership
(Intermediate)

- Communication
(Intermediate)

- Networking
